Notes:
Blank result cells indicate no data available.
Yellow highlighted cells indicate readings that exceed residential screening criterion.
* = Analytical results indicate anomalous readings compared to previous results. VMP location resampled to verify results from the laboratory.

AECOM Qualifiers
J = Estimated detection
UJ = Estimated non-detect
U = Non-detect due to blank contamination
ND, UJ = Non-detected compound associated with low bias in the continuing cal bration verification

Lab Qualifiers
J = Estimated value; results between the MDL and RL
U = Compound analyzed for but not detected above the RL

SEE LAST PAGE OF TABLE FOR NOTES

Notes:

Lab Qualifiers

J = Estimated value; results between the MDL and RL

U = Compound analyzed for but not detected above the RL

AECOM Qualifiers

J = Estimated detection

UJ = Estimated non-detect

U = Non-detect due to blank contamination

ND, UJ = Non-detected compound associated with low bias in the continuing calibration verification

Notes:
Yellow highlighted cells indicate readings that exceed residential screening criterion.

AECOM Qualifiers
J = Estimated detection
UJ = Estimated non-detect
U = Non-detect due to blank contamination
ND, UJ = Non-detected compound associated with low bias in the continuing calibration verification

Lab Qualifiers
J = Estimated value; results between the MDL and RL
U = Compound analyzed for but not detected above the RL

Notes:
Yellow highlighted cells indicate readings that exceed residential screening criterion.

AECOM Qualifiers
J = Estimated detection
UJ = Estimated non-detect
U = Non-detect due to blank contamination
ND, UJ = Non-detected compound associated with low bias in the continuing calibration verification

Lab Qualifiers
J = Estimated value; results between the MDL and RL
U = Compound analyzed for but not detected above the RL

Appendix 2-A. Boring Logs

LOG OF BORING
B-1

Start Date: 5/14/08 Completion Date: 5/21/08
Coordinates: Northing:792528.13 Easting:2321982.84
Boring Location: Village of Roxana
Ground Elevation: 443.24

Depth In feet	Inches Driven	Inches Recovered	PID (ppm)	Sampler Graphic	Symbol	USCS	DESCRIPTION	NOTES
			0.0			FILL	Gravel base coarse, gravel asphalt, and gravel FILL (FILL)	Boring advanced to a depth of 8' via hand auger, then continued with geoprobe
			0.0			CL	Soft to medium stiff, moist, brown and gray, medium plastic CLAY (CL), trace gravel	Slight tar odor
5			0.0				Becomes reddish brown	(05/14/08) Sample B-1-03 collected for VOCs
			0.0			CL	Soft, moist, brown, low plastic silty CLAY (CL)	
			2.1			SC	Medium dense, moist to wet, brown, fine grained clayey SAND (SC)	Air knife completed deeper than hand auger. Soil contact not observed.
10	48	32					Dark and light brown banding	
			3.7					
	48	20	3.0			SP	Loose, dry, tan, fine grained SAND (SP)	
15								
	48	32	0.9					
			1.4					
20							Becomes medium dense, fine to medium grained	
	48	32	2.1					
			1.8					

Completion Depth: 60.00 ft bgs
Project No.: 21561979
Project Name: Route 111 and Rand Avenue Vicinity
Drilling Contractor: Roberts Environmental Drilling, Inc.
Drilling method: Hand Auger / Dual-Tube Geoprobe Rig Type: 6610DT
Drilled by: J. Cox
Logged by: W. Pennington / M. Miller

Water Depth: 49 ft., After ATD hrs.
Water Depth: _____ ft., After _____ hrs.

▼ Water level ATD
▽ Water level after drilling
Air Knife / Hand Auger Sampler
Unified Soil Classification based on field visual observations.

ATD - At time of drilling
☐ Hollow Stem Auger - Soil sampling not performed
■ Split Spoon Sampler
◧ Geoprobe - Soil sampling not performed
☒ Geoprobe Dual-Tube Sampler
