

Operation of the Steam Enhance Extraction (SEE) System at the Roxana former Public Works Yard (FPWY) was suspended on October 21, 2024, for system repairs and evaluation. Due to winter operating considerations (snow and ice), system operations will resume in Spring 2025 during warmer weather. Planned winter activities include:

- Operation of the existing Soil Vapor Extraction System.
- Continued sampling and monitoring of Soil Vapor Points.
- Continued maintenance and operational improvements to the SEE System.

An updated factsheet will be sent before the SEE System restart in Spring 2025.
