Re: Dissolved Phase Groundwater Investigation and P-60 Free Product Delineation Workplan  
Site number 1191150002 – Madison County  
Equilon Enterprises LLC

Dear Mr. Moore:

Shell Oil Products U.S. (Shell) requested URS to develop and submit the above-mentioned Workplan on our behalf. Once the scope of the Workplan is finalized, and approved by your agency, Shell will request URS to schedule and complete the Workplan according to the finalized scope.

The results of this work and other currently available information will be used to help refine the conceptual site model for the subject area. Once the extent of any impact has been adequately delineated, the need for further work in the area will be evaluated and presented to IEPA for consideration and approval at that time. If actual threats to human health and the environment for which it is responsible are indicated during the fieldwork, Shell will meet with Illinois EPA to explore ways to mitigate those threats.

If you should have any question, please contact me at [kevin.dyer@shell.com](mailto:kevin.dyer@shell.com) or (618) 288-7237.

Sincerely,

**SHELL OIL PRODUCTS US**
