

## CONSTRUCTION OF REMEDIATION SYSTEM IN ROXANA, ILLINOIS TO BEGIN

**WHO:** Shell Oil Products US

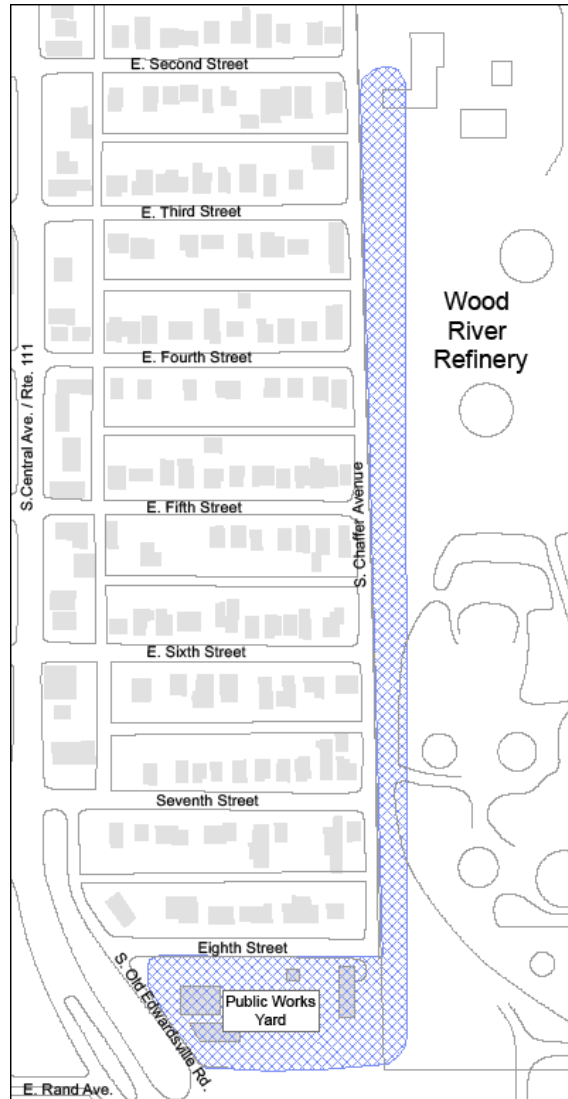

**WHAT:** URS and other contractors, on behalf of Shell Oil Products US have been working in the area near Chaffer Street between First Street and the Roxana Public Works Yard. The work, performed under the oversight of Illinois EPA, is to construct a soil vapor extraction system inside the Wood River Refinery, to remove hydrocarbon vapors from the subsurface.

There will be construction equipment in the area as part of this work, e.g., dump trucks, cranes, concrete trucks, drilling equipment, etc. During the work, the contractors will maintain awareness of the noise levels and if necessary, noise reduction measures will be implemented, such as the use of temporary sound walls.

Also, whenever possible the use of motorized equipment will be limited to between the hours of 8:00 am and 6:00 pm. Extended street closures are not anticipated. Shell and its contractors will work to minimize the impacts that could arise from the construction activities and apologize for any inconvenience this may cause you.

**WHEN:** Starting October 17, 2011. The work is expected to take approximately 3 months. The work is planned to occur during the day, Monday through Friday.

**WHERE:** The primary work is being conducted inside the Wood River Refinery and on the Roxana Public Works Yard (blue hatched area shown on map).

**CONTACT:** Thank you for your patience and cooperation during construction. If you would like more information, or have concerns once the construction begins, please contact the project outreach contact, Bob Miner at (314) 367-8082 or 1-(888) 974-8379. Mara McGinnis or Gina Search of Illinois EPA can also be contacted at (217) 524-3288 or (618) 346-5157, respectively, if you have any questions regarding this project.
