**Subject: Roxana Ambient Air Sampling  
1191150002 – Madison County  
Equilon Enterprises  
Roxana, Illinois**

Dear Jim:

As requested by the Illinois Environmental Protection Agency (IEPA), Shell Oil Products US (SOPUS) provides the following work plan to address the IEPA's request for follow up investigation of ambient air benzene levels.

Shell has contacted Phillips 66 Company and proposes to request Phillips' 66 consultant CTEH to place two additional canisters for ambient air sampling in the Village of Roxana. These canisters will be placed in two areas above the subsurface soil vapor plumes to supplement the ambient air monitoring work being undertaken by Phillips 66. The canisters will be added at the following locations:

- 147 E 4<sup>th</sup> Street – This is the former Corzine home; the Corzine's have moved out and Shell is in the process of transferring title to the property.
- The intersection of Chaffer and 8<sup>th</sup> Street. The canister will either be placed on a support provided by CTEH on Phillips 66 property or hung on a light post/street sign or similar Village property, subject to the Village's consent to access.

The Summa canisters will be positioned at a height of approximately 3 to 5 feet above ground. The canisters will be deployed by P66's contractor, CTEH, and will follow the schedule, sample collection, and analytical procedures set forth in CTEH's ambient air sampling work plan. Data will be shared with Phillips and IEPA.

If you have any questions or require additional information, please contact Kevin Dyer, Shell Principal Program Manager, at [kevin.dyer@shell.com](mailto:kevin.dyer@shell.com) (618/288-7237), or Bob Billman at [bob.billman@urs.com](mailto:bob.billman@urs.com) (314/743-4108).

Sincerely,  
URS Corporation, on behalf of SOPUS

Robert B. Billman, PG  
Senior Project Manager
